

Dear member of the NTCC,

I am a student 'Human Resources Management' at the Stenden Hogeschool at Leeuwarden. Currently I am in my fourth year and this means that this year I have the opportunity to do an internship at a company I please. This is also the reason of this letter. The internship has to start in February 2017 and will take ten months. During this period I have to spend three months on writing my Thesis.

The courses I have completed have given me a solid foundation in the tools, processes and methodologies involved in successful analysis. I have a proven ability to learn challenging concepts quickly and have developed competencies in diverse areas, as you can see in my transcript. Furthermore I am undertaking, supporting and eager to learn.

In addition to my analytical strengths, I have advanced computer skills (with cross-platform expertise in Windows and Mac); expertise in the MS Office suite of products.

I'm looking for an internship that not only gives me the chance to finish my education, but also gives me possibilities to develop my career internationally. I enjoy travelling and have visited Canada, Asia and Africa. Travelling has also made me realise that the world is a big place with lots of opportunities. Working with different cultures interests me as a HRM student and therefore, a company with international influences would be the perfect for me. As it could also mean that I have an opportunity in the future to live and work in a different country than the Netherlands.

In the future I want to be working at an International company and hopefully at a strategic level. Strategic Planning is something I have always been interested in and find quite interesting. It is something I do not only use for school, but it's also something I use in my daily life. I've studied a lot about this topic and didn't only read the books school recommended.

The enclosed Curriculum Vitae (Resume) and transcript provides you with more details of my skills and achievements. I feel I could make a valuable addition to your team and I hope you will give me the opportunity to prove this and to learn from your company. This internship could not only be the end of my education but also the beginning of my career. I hope you feel the same way and I'm looking forward to your answer.

With kind regards,

Ids Jelle van der Plas.
