Our initial focus was on establishing a business aimed at providing additional assistance to high-school students amidst the COVID-19 pandemic. The company's main activity was providing online tutor sessions to high-school students, facilitated by university students. My activities within the company included creating the website, promoting and enhancing social media content, establishing internal protocols, and drafting policies. This venture played a fundamental role in the development of my passion for start-up enterprise development. However, as the pandemic situation evolved, the demand decreased, ultimately leading to the company's discontinuation.

## About me

At present, I am a third-year student of International Business student pursuing my degree at Hanze University. I come from a family of Korean and Dutch descent, and we take an active role in supporting adopted Koreans in the Netherlands. Additionally, I am actively involved in providing support to Korean exchange students in Groningen.

My objective for this internship is to gain hands-on experience that complements the theoretical knowledge I have obtained in my academic pursuit. Specifically, I aim to broaden my understanding of the onboarding process, market research, and the development of corporate strategies
